

# Head & Neck Cancer

And Your Patient

## Adelaide ENT Surgery have a special interest in Head & Neck Cancer

A/Prof Eng Ooi and Dr Himani Joshi have a special interest in Head & Neck Cancers.

They provide care for patients with masses in the tonsil, throat, tongue, larynx (voice box), salivary glands (parotid), thyroid and neck.

Both A/Prof Ooi and Dr Joshi work at Adelaide ENT Surgery and Flinders Medical Centre.

They have a strong affiliation with FMC's Head & Neck Cancer Multi-disciplinary group, which has different specialties – radiation oncology/ medical oncology/ speech therapy/ dietetics/ radiology/ pathology/ nurse practitioners – meeting together weekly to discuss the best treatment options for your patient.

*Multi disciplinary management is the optimal pathway for patients with cancer.*

A/Prof Ooi uses the MedRobotics Flex System in suitable patients – robotic surgery to remove tonsil and tongue cancers.

As a result of our affiliation with both Flinders Medical Centre and Flinders Private Hospital, we are able to see both insured and uninsured patients here at Adelaide ENT Surgery.

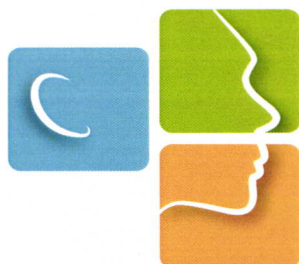

If you have diagnosed Head & Neck cancer in your patient, contact us for an urgent appointment.
